Rea™ Azalea® Minor – designed for petite adults and teenagers

The Rea™ Azalea® Minor is designed for clients that require a seat that has a smaller depth and width. Adapted from the Rea™ Azalea®, the Azalea® Minor boasts all the advantages of a reliable, tilt-able wheelchair with its special weight-shifting mechanism. This new model is ideal for all clients that require a solid, stable wheelchair.
Rea™ Azalea® compatibility continues

A new addition to the Rea™ Azalea® family, Azalea® Minor is designed for clients that need a smaller-sized seat, such as petite adults or teenagers. One of the key features of Azalea® Minor is the ‘Tilt in Space’ weight-shifting mechanism, which ensures a stable tilt and makes manoeuvring easier. As with all the Azalea® models, the width and depth of the Azalea® Minor can be adjusted to suit individual needs. The image shows the Azalea® Minor with optional larger rear wheels.

Push handles outward angled

The push handles are angled outwards, increasing comfort for carers. For a complete range of accessories and options please see the Rea™ Azalea® accessories brochure.

Options / Features

Laguna back cushion
The inner dimensions are as large as the Azalea®, at 39 cm wide.

Shorter Chair
The chassis is 3 cm shorter; the seat depth is 5 cm shorter and the back-rest 10 cm lower than on standard models.
